

NAME.....**Classroom****Date**.....

UNIT TEST The Cell and its structure

Activity 1 Fill the gaps

Cells are made up of different parts called.....

Plant cells are similar to..... cells.

Plant cells have some parts that animal cells don't have like the.....

Chloroplasts contain

All things are made up of cells

Living, bacterium, tissues, animal, organelles, vacuole, chlorophyll

Activity 2 True or false

We say that the cell is the basic unit of life. **T F**

Cytoplasm is where all the chemical reaction take place. **T F**

Plant cells don't need sunlight. **T F**

The cell wall surrounds the cell membrane. **T F**

The vacuole can occupy up to 50% of a plant cell. **T F**

Activity 3 Match the sentences with the corresponding words

| | |
|---------------------|--|
| Cells | Is where photosynthesis happens. |
| The Golgi Apparatus | surrounds the cell membrane. |
| Chloroplasts | are made up of different parts called organelles. |
| The cell wall | is a space inside the cell which contains a liquid. |
| | proteins go there and is involved in the formation of lysosomes. |

Activity 4 Describe an animal cell and a plant cell
