

## AMPHIBIANS

The word "amphibian" means two-lives, one in the water and one on land. They live the first part of their lives in the **water** and the last part on the **land**. Most amphibians are born from **eggs**. After they are born, their bodies are like fish. They have **gills** to breathe under water and **fins** to swim with.

Later they grow legs for walking on the land and **lungs** to breathe air.

### Picture Dictionary

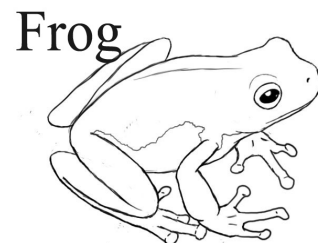

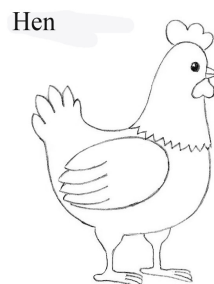

**All amphibians go through some sort of metamorphosis.**

**Metamorphosis** means changing from one form into another.  
These animals look very different as babies than their parents do.

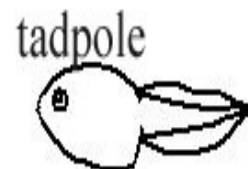

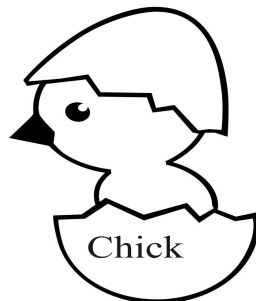

**Growing up: What animals look very different as babies than their parents do?**
